Cinematography is a method of psychoanalytic training. Listeners develop the skill to interpret the content of the film from the standpoint of a particular psychoanalytic theory, from the standpoint of a psychoanalytic understanding of human development. Since creativity is a representation of the early mental traumas of the authors, in order to understand mental processes, we simultaneously analyze the creative personality: the world-famous Swedish producer Ingmar Bergman. The program uses the book by D. Garillo and D. Lisek
